

### ADVANTAGES

- Good pulsability
- Recommended as a pre-filter, not recommended as a final filter
- Self-cleaning cartridge filter with long filter life
- Extends final filter life when used as a prefilter

<b>Application</b>	Desert and arctic environments, heavy dust load areas Pre-filter for gas turbines, large industrial air compressores, diesel & gas engines, generators & enclosures
<b>Frame</b>	Galvanised steel;Stainless steel AISI 304L, 316L
<b>Gasket</b>	Polyurethane, endless foamed;EPDM
<b>Media</b>	Synthetic
<b>Rec. final pressure drop</b>	1000 Pa
<b>Max Temperature (°C)</b>	70° C
<b>Pleat</b>	Dimple

<b>Comment</b>	<p>Caps: Galvanized (Standard), stainless steel (AISI304 / 316) or powder-coated                      Fire rating: Available according to DIN 4102-b2                      Holding frames: Various on request. Sizes: Co-cy, cy-cy, Tenkay and others on request</p> <p>Additional product features:                      Self-cleaning air filter cartridges                      Medium filtration efficiency                      Effective dust holding capacity                      Built-in structural strength                      Galvanized metal finish                      Media protected by metal liners on both sides                      Tenkays are available with the Gold Cone option for improved pulsing.                      Other filter sizes are available. Contact us for more information.                      Retrofit filters are also available for all competitor housings.                      Filter wraps available on demand</p>
----------------	---

CamPulse filter systems are designed to protect rotating machinery in high dust load environments. The cleaning system provides continuous operation and stable pressure even in extremely dusty environments.
